

Western Treasure Valley Food System Partnership

A Collaboration For A Nourished Future

The **Western Treasure Valley Food System Partnership (WTVFSP)** is a collaboration of social service and food systems stakeholders across the Western Treasure Valley region, in rural eastern Oregon and Idaho. The WTVFSP works to improve the coordination and sustainability of the regional food system by sharing nutrition support programs and education, and food-system-related economic development opportunities in the area.

Partnership Goal

The partnership aims to remove barriers to access by creating a robust and sustainable food system. Solutions developed by the partnership include the creation of a Community Food Center to increase nutrition education and programming in the Western Treasure Valley.

Mission & Vision

Vision: We envision a thriving and resilient Western Treasure Valley community.

Mission: We nurture connections, strengthen community power, and respond to our community's needs by supporting initiatives that transform systems of inequity and address the root causes of hunger.
